Belt-Level Overall Concept and Functional Coordination (Concept Draft)

Jingzhang AI Innovation Belt • Jingzhang Railway Heritage Park Green Belt • Haidian

A0-01 Overview

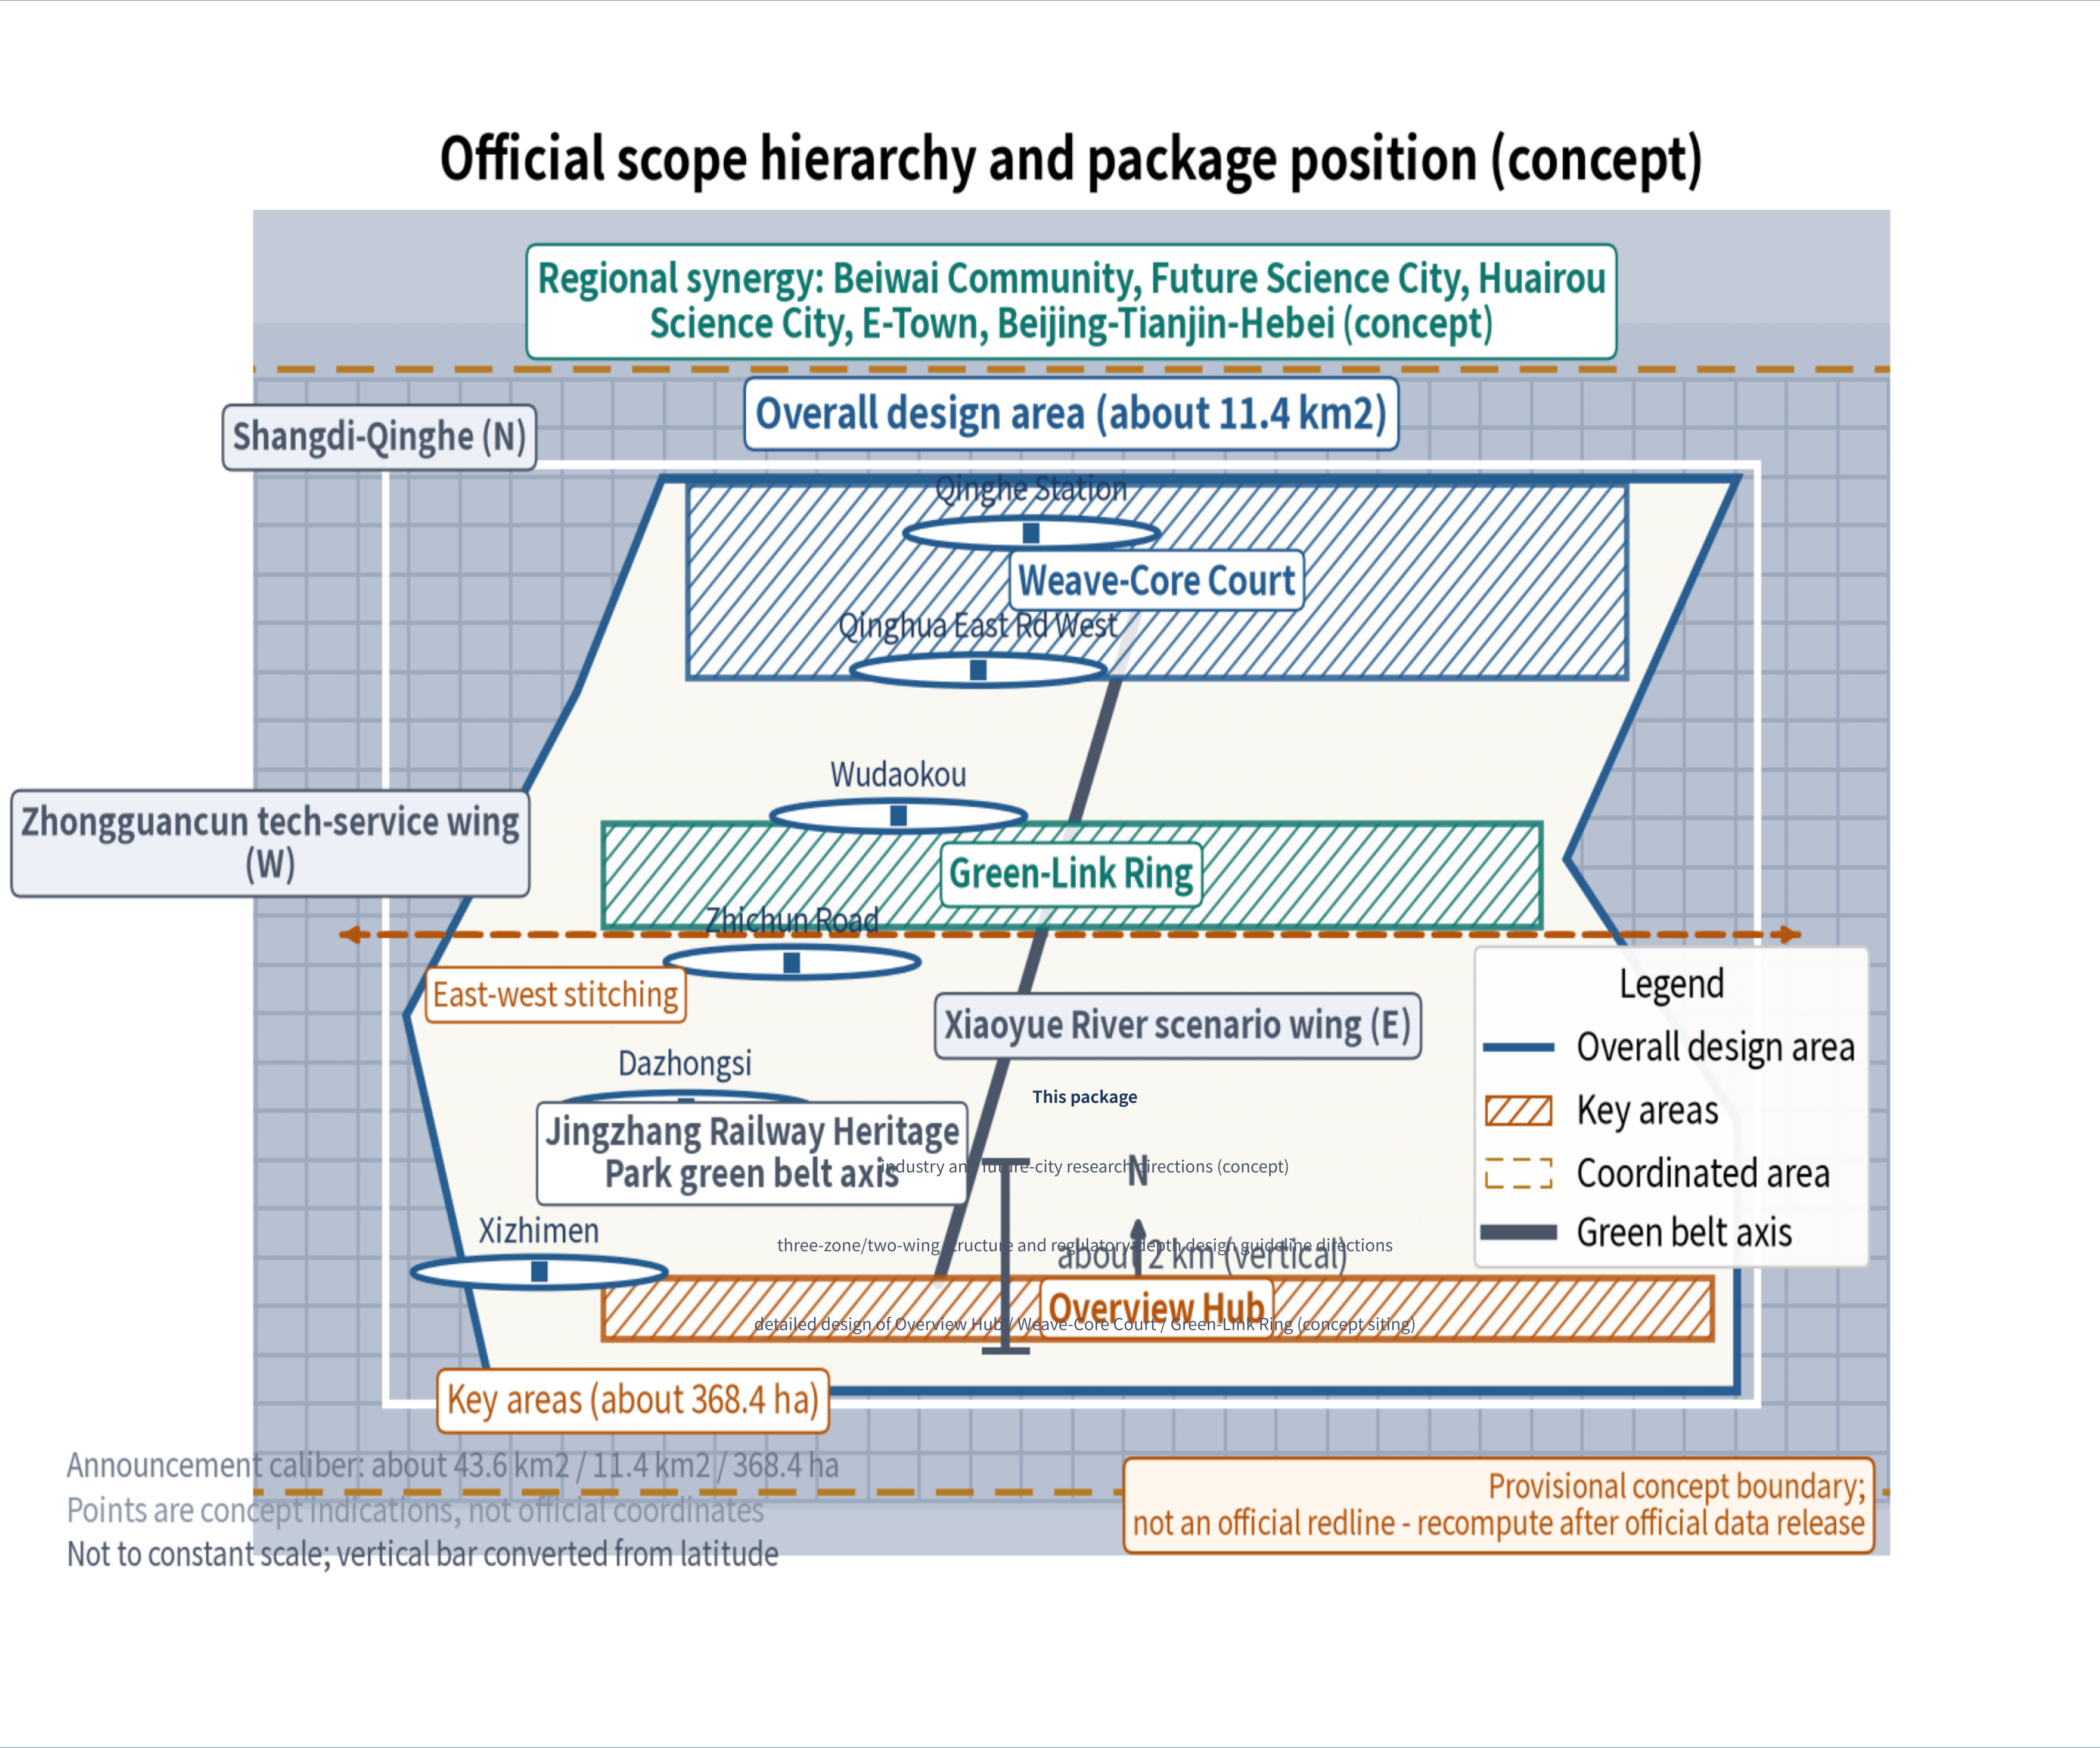

Coordinated research area about 43.6 km2 | Overall design area about 11.4 km2 | Key areas about 368.4 ha

Overall concept highlights

Three positioning pillars: public activation axis of century-old railway memory / exchange and showcase axis of global AI innovation coordination / future demonstration axis of blue-green slow-traffic liveability. Five functions: cultural memory and heritage display / innovation exchange and launch display / commercial services and daily amenities / blue-green ecology and recreation / transit connection and slow-traffic interchange. Explicit mapping: culture-memory zone (AI Origin Community extension) / innovation-vitality zone (Zhongzhiyuan AI Acceleration Zone) / eco-liveability zone (linking Dazhongsi AI Cluster Zone) / Zhongguancun Technology-Service Wing (west) / Xiaoyue River Scenario-Empowerment Wing (east). Regional synergy: Zhongguancun / Wudaokou / Xueyuan Road / Shangdi / Qinghe / Beiwai Community / Future Science City / Huairou Science City / E-Town / Beijing-Tianjin-Hebei (concept). AI governance, three sentences: anonymized aggregates only / key decisions human-reviewed / no over-surveillance.

Official scope hierarchy (taskbook text caliber)

Tier	Text caliber
Coordinated research area	about 43.6 km2
Overall design area	about 11.4 km2
Key areas	about 368.4 ha

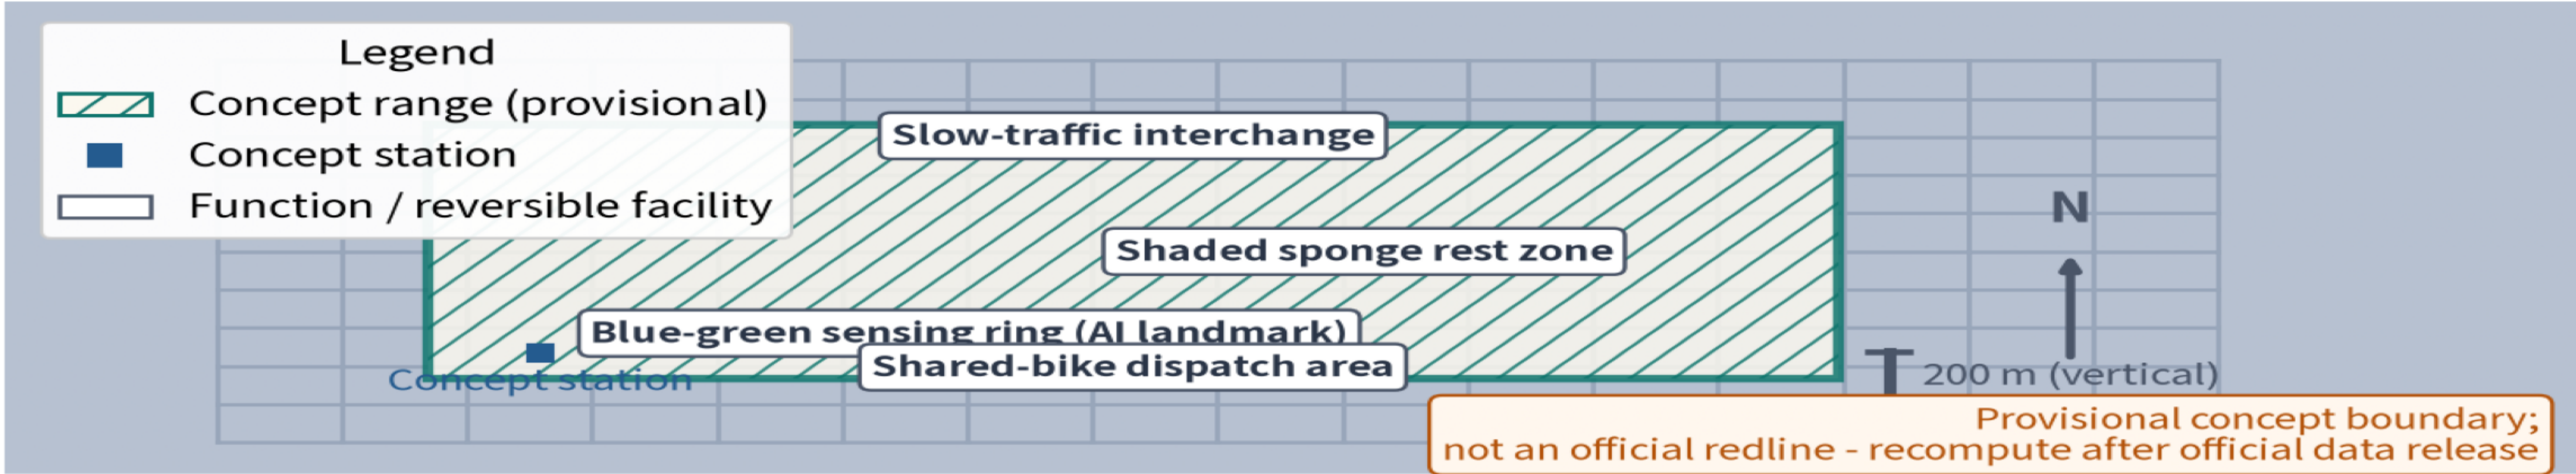

This package is concept suggestion / reference proposal: no FAR, height, retain-demolish, investment, ridership or capacity figures are concluded; boundaries are provisional and recomputed as a whole after official data release; the framework does not replace existing district plans.

A0-02 Nodes and implementation

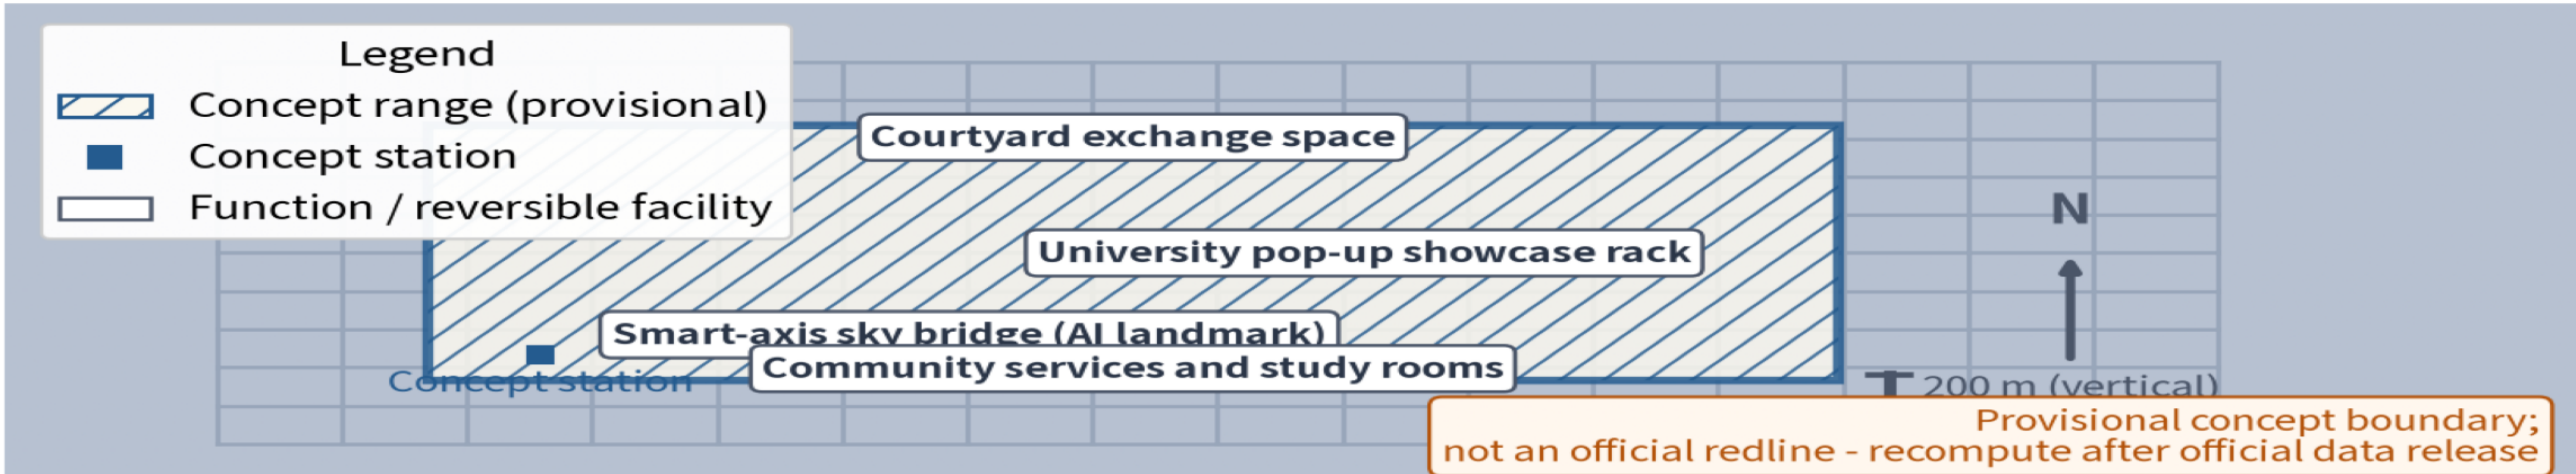

North-to-south order (north at top): Green-Link Ring (N) to Weave-Core Court (M) to Overview Hub (S); consistent with the proposal and figures.

Detailed design of the three key nodes (north at top, matching the proposal)

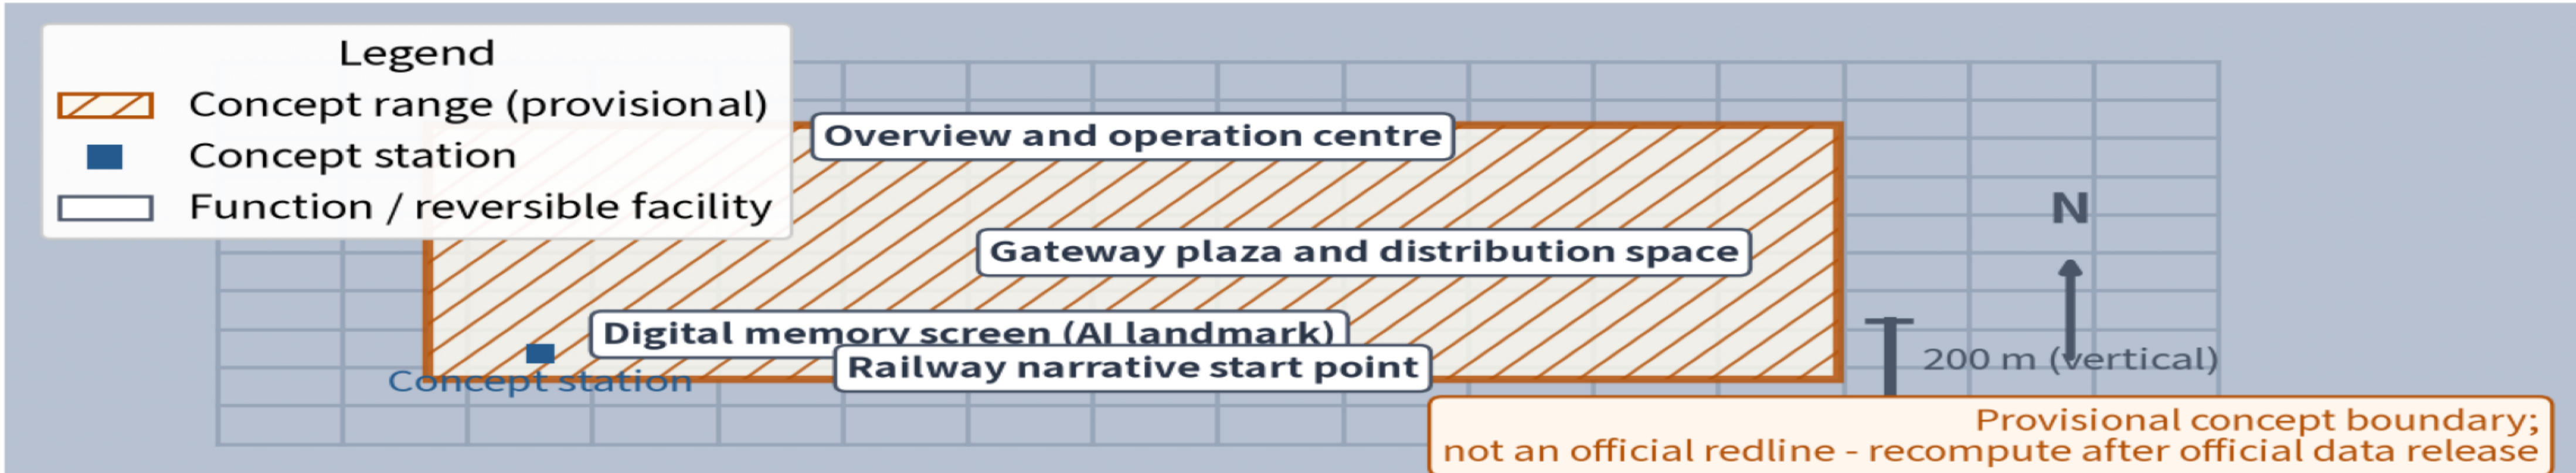

Green-Link Ring | North • slow-traffic and blue-green conversion hub

Weave-Core Court | Middle • functions and community services interwoven

Overview Hub | South • belt gateway and coordination showcase

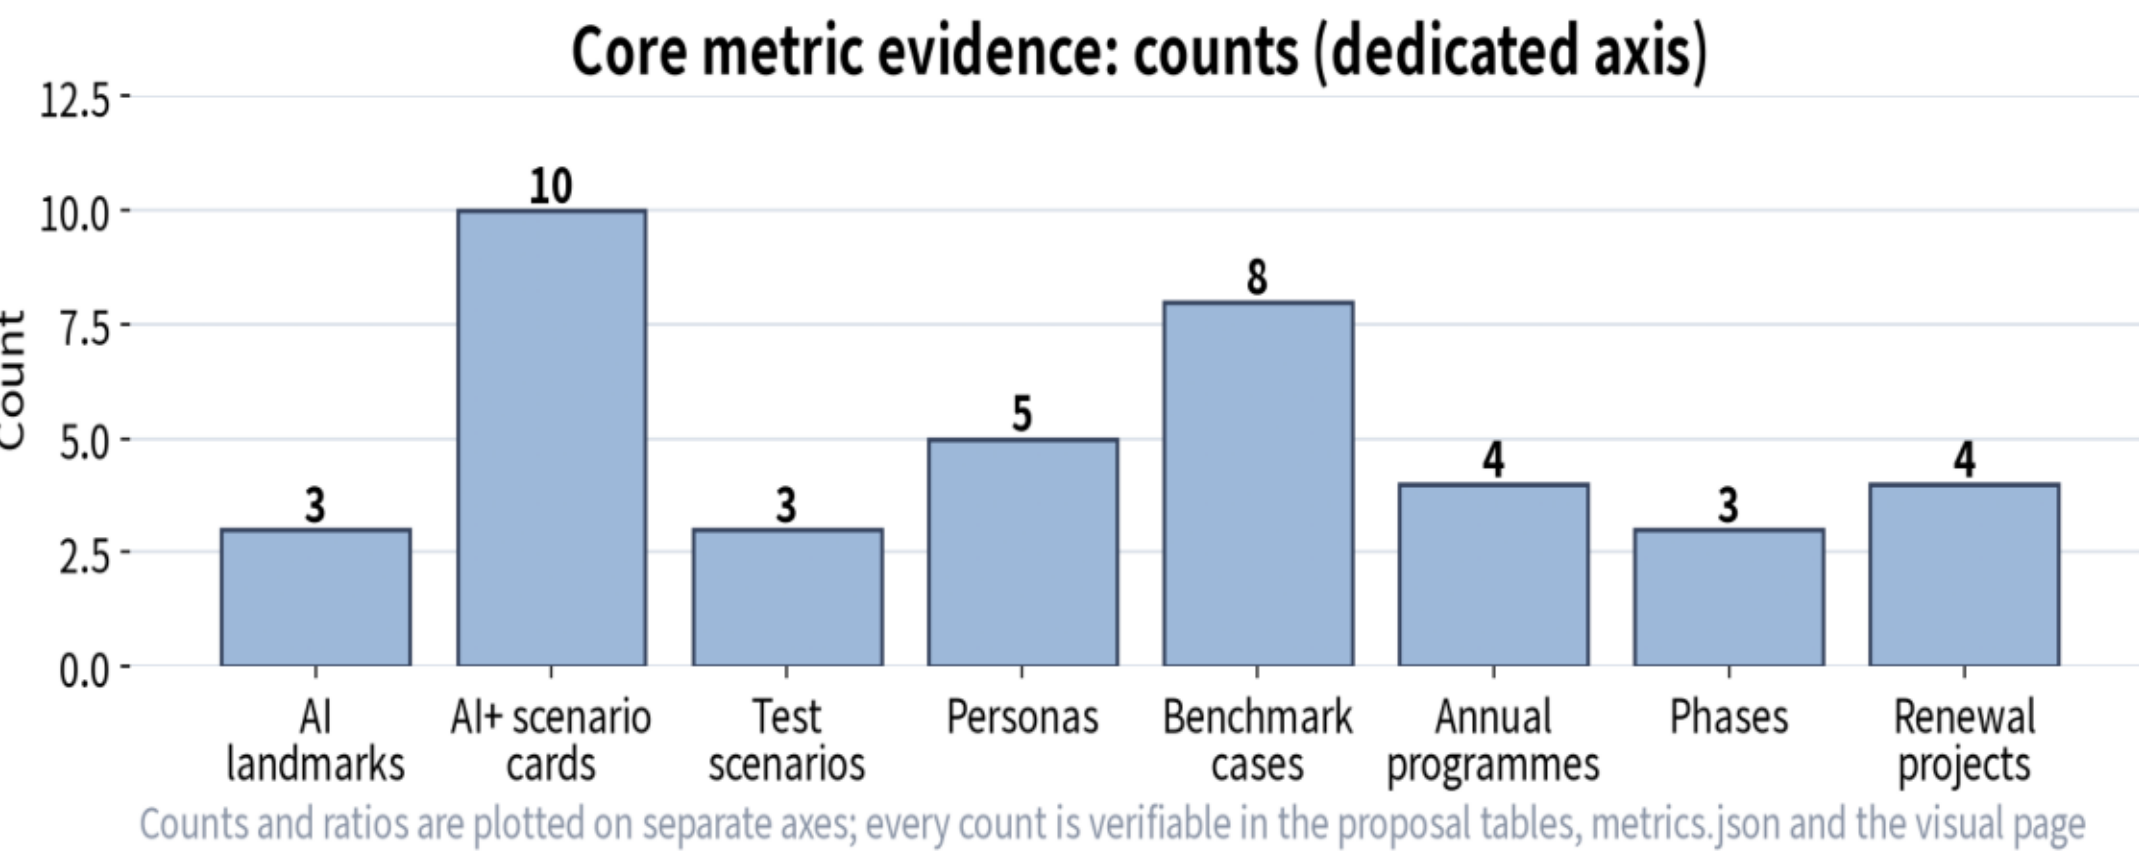

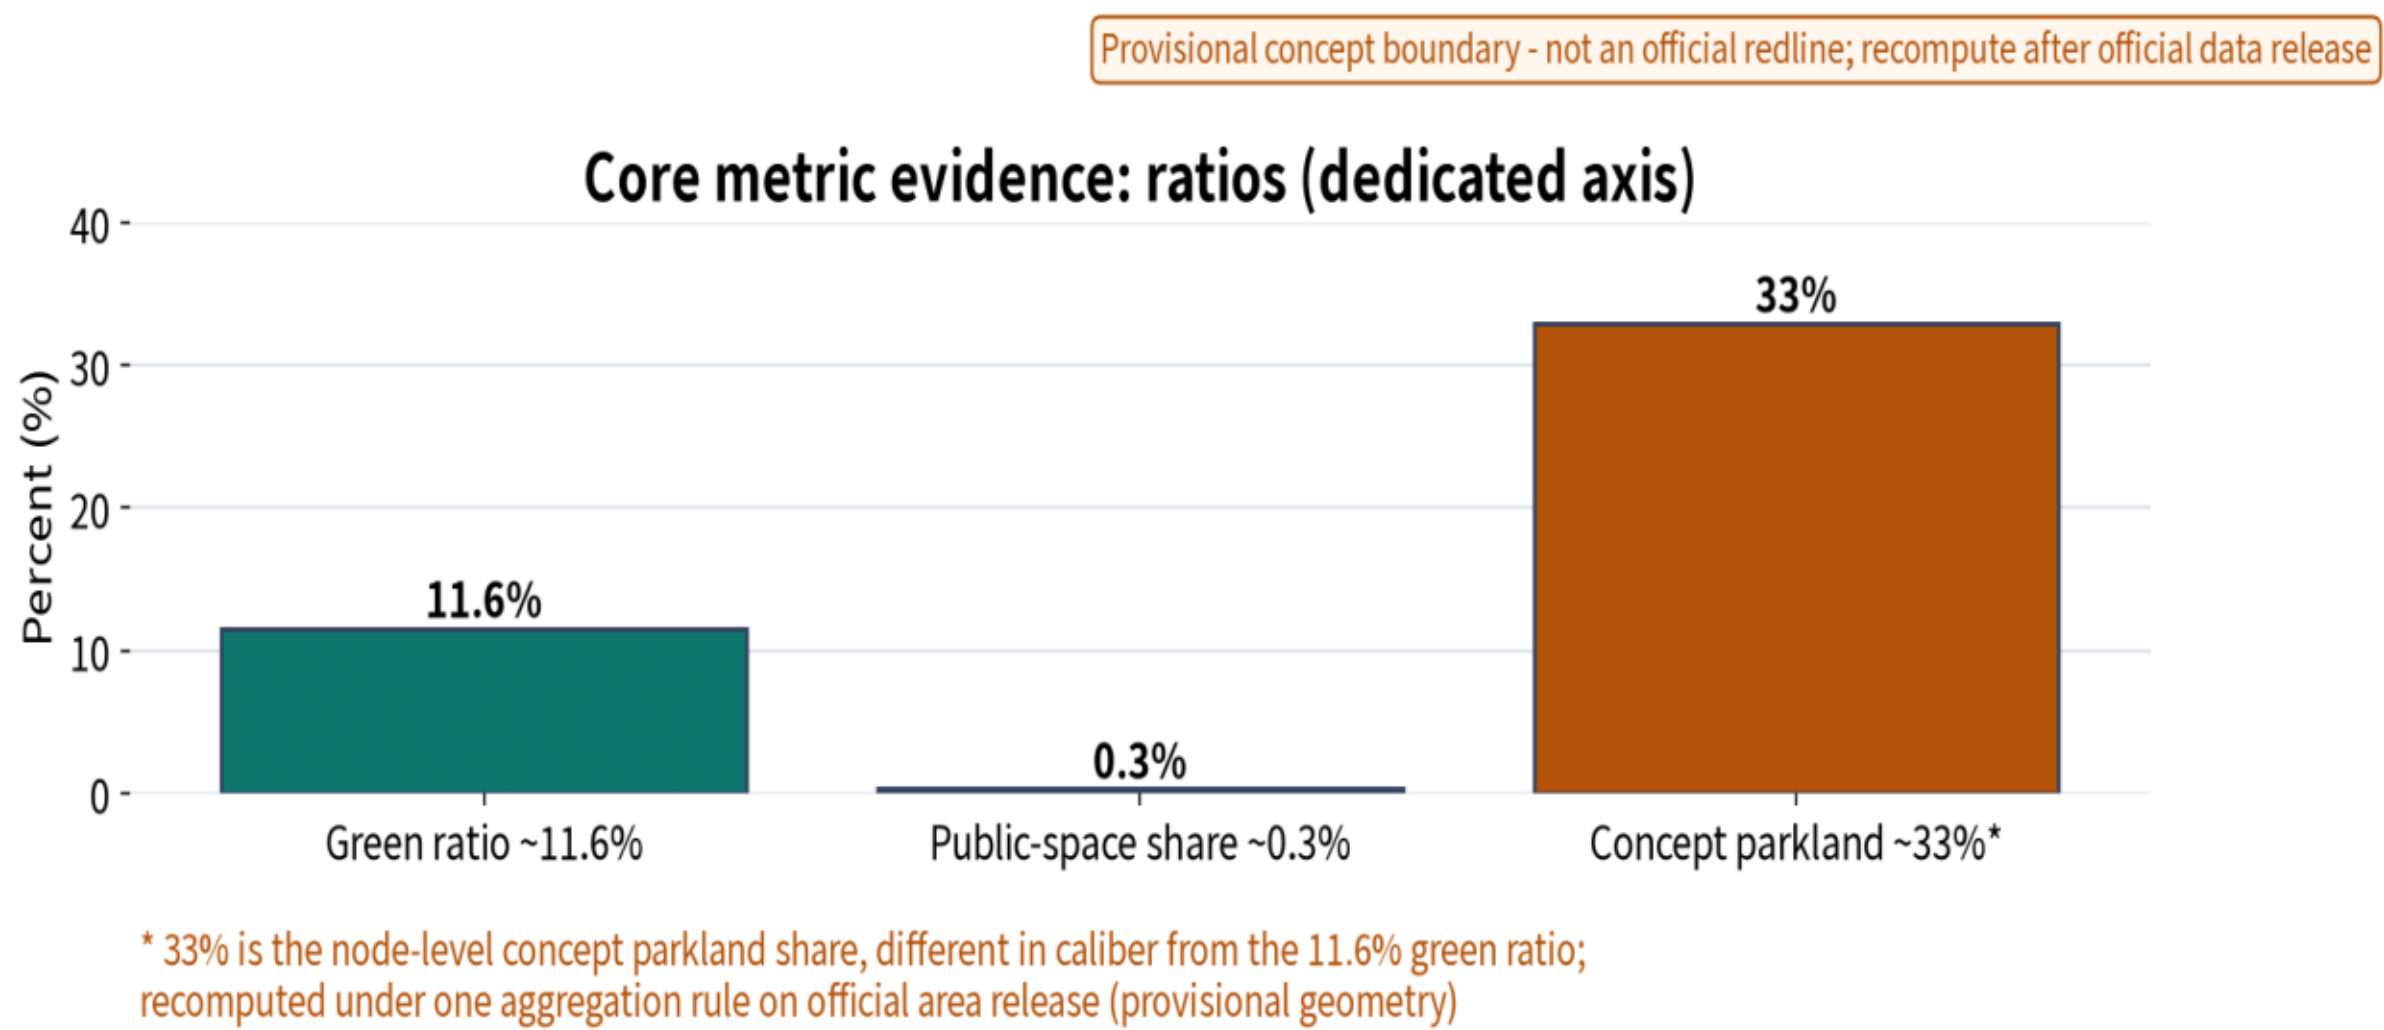

Concept siting; to be re-validated through planning, heritage and authority assessment

Phasing and operation mechanisms

Mechanism toolbox: covenant / deliberation / points / disclosure / filing / alliance / volunteer / reservation / rotation / grading |
Named mechanisms: Deliberation Hall, Green-Link Covenant, Co-creation Points

Phase	Main tasks	Lead / collaborators	Decision gate and exit
Near 1-3 y	Break green-belt gaps, Overview Hub pilot, platform launch	District coordination leads; sub-districts/operators/universities	Annual evaluation; stop and exit if pilot fails
Mid 3-5 y	Weave-Core Court, Green-Link Ring, stitching, guidelines	Construction body leads; transport/landscape/heritage	Special studies and statutory procedure; mid-term evaluation
Far 5-10 y	Full-line growth, two-wing linkage, normalised operation	Multi-party joint meeting leads; enterprises/universities/communities	Five-year re-review; recompute on official data

Brand prior-rights statement: internal working codename; no external registration or use before trademark clearance.
