

NIGHT • JZ NIGHT LIGHT LOOP: NIGHT ECONOMY & LIGHTSCAPE OPERATION BELT

Land stock-first	Space one-loop-3N	Concept master board (A0-01) - Central Jingzhang AI Innovation Belt, night quality dimension - One Light One Show One Market x five-mechanism loop x light element mechanism	Capital tiered	Talent personas	Compute light	Data aggregated	Scenario open
------------------	-------------------	--	----------------	-----------------	---------------	-----------------	---------------

Overall Design Overview: One Loop, Three Nodes & Lighting Tiers (provisional geometry)

The Night Loop follows the Jingzhang heritage park belt, linking Night Lounge - Night Stage - Night Market; lighting tiered gateway - path - node - dark zone, with dark-sky friendly zones around green edges

One Light - One Show - One Market (concept)

Night Lounge: lighting-tier hub + guidance start (Zhongzhiyuan)
Night Stage: time-based soundscape shows (AI Origin Community)
Night Market: reversible stall market (Dazhongsi)

Five-mechanism loop (concept)

Time-based permits | lighting tiers | service credits
Event filing | annual disclosure (human review)

AI ecosystems & governance (concept)

10 AI scenario cards (anonymised aggregation + human review + stoppable)
3 industry test protocols (sandbox/exit) + 8-element mechanism
Open operation rules: data quality - shadow compare - measurable pass/fail

Source: this package geometry/*.geojson (participant provisional model data); area caliber EPSG:4548; displayed values rounded.

Provisional concept boundary; not an official redline; recompute after official data release

Coordinated research scope

≈ 43.6 km2 | positioning - scenario library - method

site_area_sqm = 11412825

≈ 1141 ha (≈ 11.4 km²)

Overall design scope

≈ 11.4 km2 | One Loop Three Nodes - tiers (sub-scope)

green_ratio = 0.110044

≈ 11.0 % (绿线概念口径)

Key areas

≈ 368.4 ha | Night Lounge / Night Stage / Night Market

public_space_ratio = 0.004543

≈ 0.45 % (概念口径)

Global AI Innovation Ecosystem Benchmarks & the Eight-Element Mechanism: Land/Space/Industry/Spatial/Talent/Symbolic/Compute/Scenario
Cases borrow mechanisms only (public-channel overviews registered case-by-case in sources.json); all element mechanisms are concept suggestions

Key Areas Ecosystem Benchmarks - Metrics & Governance (A0-02)

Concept: Land-Use Structure (single caliber - national code public subset)

Aggregation rule: class share = sum of concept parcel areas per code / site area (areas in EPSG:4548, geometry/land_use.geojson)
