

PROVISIONAL — Reproducible concept package only. Verify official boundary, ownership, heritage, fire, accessibility and operating controls before any decision.

DATA • JZ overall structure: service centre • test field • literacy hall

One data loop, three public-service nodes, two learning wings | concept diagram, not an official redline

PROVISIONAL • concept boundary • recompute

01 | Site overview: one loop, three nodes, three landmarks, two wing interfaces

Three node decision cards: input • space • responsibility • exit

Registration → controlled testing → public literacy; every node has a human fallback

PROVISIONAL • concept boundary • recompute

02 | Key areas: input → space → output → human exit

Land-use reading and formal geometry ratio

Broad concept layer is not the strict green_ratio; all geometry remains provisional

PROVISIONAL • concept boundary • recompute

Concept compatibility layers

Schematic only • no FAR, height, demolition, road redline or engineering conclusion

FORMAL METRICS / 严格口径

FAR, height, capacity and investment: UNKNOWN / NULL until official controls.

03 | Land-use structure: compatible concept layers and separate formal metrics

Evidence dashboard: formal ratios and auditable counts

Ratios and counts are separate scales; values are concept-model evidence, not performance promises

PROVISIONAL • concept boundary • recompute

EPSG:4548 • package geometry • recompute after official data

04 | Metrics evidence: formal values, operating counts and boundary ledger

Three nodes
