

DATA • JZ Data-Element Loop

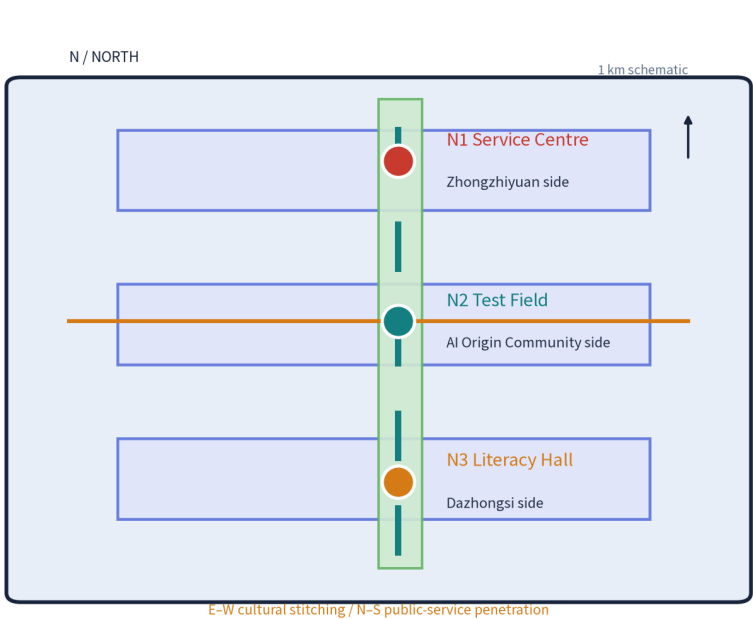

English A3 booklet | Service Centre — Test Field — Literacy Hall

PROVISIONAL — concept delivery only; official verification is a gate.

DATA • JZ overall structure: service centre • test field • literacy hall

One data loop, three public-service nodes, two learning wings | concept diagram, not an official redline

PROVISIONAL • concept boundary • recompute

Regional learning interfaces: Beiwei • Future Science City • Huairou • BDA • BTH

Zhongguancun Science-Service Win

Xiaoyuehe Scenario-Enablement Wi

Legend / evidence

- 01 overall concept boundary
- 02 three provisional areas
- 03 green-space layer
- 04 data loop
- 05 concept landmark

All geometry and node positions are provisional. No ownership, partnership, capacity or approval is implied.

The loop turns directory access, controlled testing and public literacy into a readable civic service. It is an evidence-linked concept, not a site approval or operating commitment.

01 | Node operating cards

Three node decision cards: input • space • responsibility • exit

PROVISIONAL • concept boundary • recompute

Registration → controlled testing → public literacy; every node has a human fallback

Three nodes / two wings / provisional geometry

N1
service centre

N2
test field

N3
literacy hall

N / NORTH

N1 Service Centre

Input: public metadata / voluntary checklist

Space: directory wall + staffed desk

Output: completeness prompt + referral

Exit: unclear rights or unresolved appeal

N2 Test Field

Input: synthetic / aggregate sample

Space: controlled room + report wall

Output: test log + risk note

Exit: breach, audit failure or no takeover

N3 Literacy Hall

Input: reviewed public corpus / questions

Space: bilingual gallery + paper class

Output: lesson + human referral

Exit: unsafe access or unreviewed corpus

The three cards are service mechanisms, not approved facilities.

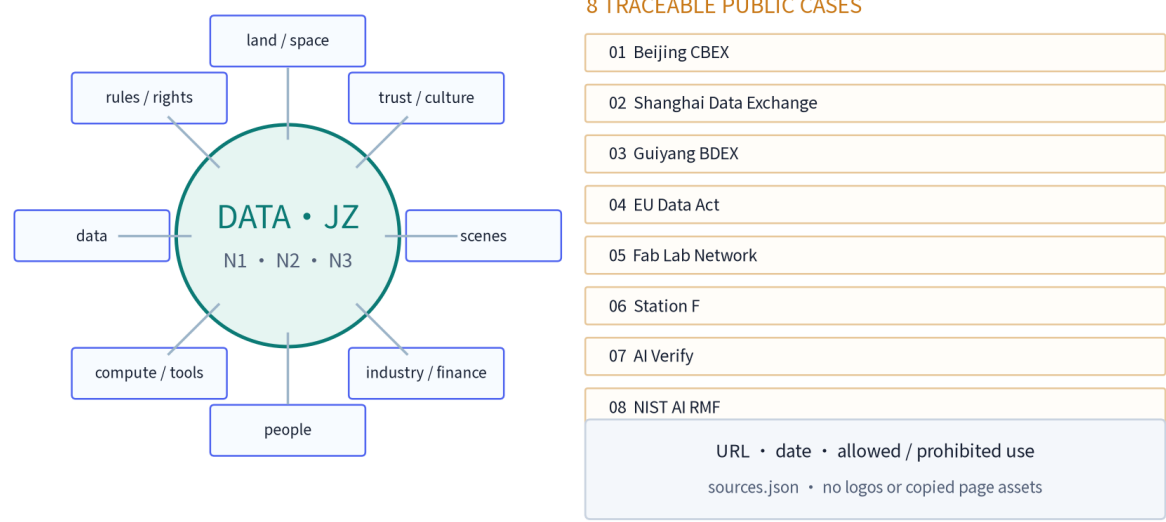

Node	Input / space / output	Human duty and exit
N1 Service Centre	Public metadata and voluntary non-sensitive material / directory wall and desk / completeness prompt, explanation and referral.	Service officer explains; unclear rights, source or appeal closure pauses service.
N2 Test Field	Synthetic, voluntary or de-identified input / controlled room, observation window and report wall / checklist prompt and test summary.	Auditor and human panel review; boundary breach, failed takeover or failed reproduction exits.
N3 Literacy Hall	Reviewed public corpus and non-identifying feedback / bilingual gallery, classroom and accessible rest points / lesson, question route and public note.	Educator/editor review; unreviewed corpus or access/safety failure exits. Paper and staff fallback stays live.

02 | Ecosystem and AI planning mechanism

Eight public mechanism cases → eight ecosystem elements

Comparison directions only; no partnership, endorsement, scale or local performance is claimed

PROVISIONAL • concept boundary • recompute

Eight public mechanism cases are comparison directions only: Beijing, Shanghai and Guiyang data exchanges; EU Data Act direction; Fab Lab Network; Station F; AI Verify Foundation; and NIST AI RMF. No partnership, logo, certification or legal applicability is claimed.

The eight-element ecosystem links land/space, rules/rights, data, compute/tools, people, industry/finance, scenes, and trust/culture to auditable outputs at N1–N3. Inputs are public, synthetic, voluntary or de-identified; only aggregated data is used for public notes.

03 | Spatial structure and evidence contract

Land-use reading and formal geometry ratio

Broad concept layer is not the strict green_ratio; all geometry remains provisional

PROVISIONAL • concept boundary • recompute

Concept compatibility layers

Public service / scenes

Blue-green movement

Reuse + culture

Interfaces / unknowns

Schematic only • no FAR, height, demolition, road redline or engineering conclusion

FORMAL METRICS / 严格口径

green_ratio

0.110044

union green / site boundary

public_space_ratio

0.003483

public / site

site_area_sqm

11,412,825.386 sqm

package geometry

FAR, height, capacity and investment: UNKNOWN / NULL until official controls.

Evidence dashboard: formal ratios and auditable counts

Ratios and counts are separate scales; values are concept-model evidence, not performance promises

BOUNDARY LEDGER

● Provisional geometry

● Human review

● Offline fallback

● Appeal + exit

UNKNOWN / NULL: FAR • height • capacity • investment; not measured and not a promise.

EPSG:4548 • package geometry • recompute after official data

The 11,412,825.386 sqm site-area model, 0.110044 geometry green ratio and 0.003483 public-space ratio are reproducible package values, not statutory rates. FAR, height, capacity and investment remain UNKNOWN/NULL because controlling records are not supplied; the boundary ledger names the exact control to obtain before recomputation.

04 | Scenes, protocols and human gates

Ten auditable scene cards cover directory search, registration, routing, demand match, sandbox admission, quality review, resident class, child/older-person class, bilingual visitor questions and the annual forum. Every card records input, model/rule, spatial touchpoint, output, human role, failure/appeal, privacy, metric and exit.

Protocol	Evidence	Human gate	Exit
T01 anonymous matching	Candidate recall, mismatch count and human-review coverage on synthetic tags.	Sandbox administrator confirms every candidate.	Mismatch or untraceable source.
T02 sandbox admission	Missing items, takeover drill and closed audit issues.	Auditor and human panel approve the gate.	Boundary breach or offline failure.
T03 quality review	Reproducibility, missing-field log and bias cases.	Developer explains; auditor reviews; no certification.	Failed reproduction or rising harm.

RACI: operator (A, to verify); service officer, sandbox administrator, educator and auditor (R); enterprise, university, community and developer roles (C); legally empowered reviewers, resident forum and public panel (I).

05 | Delivery, rights and recomputation

Verify → retain → reversible fit-out → move/remove. Start only after authorization note, minimum-data list, takeover drill, accessibility check, rights audit and exit plan. Stop on boundary breach, audit failure, unresolved complaint, lost offline fallback, ownership change or unreviewed corpus; delete temporary data and publish the reason.

Evidence / rights	Boundary	Next control
Public announcement, taskbook, policy and institutional pages	Comparison direction only; no endorsement or legal opinion.	Maintain URL, license/status, access date and prohibited-use ledger.
Package geometry and metrics	Finite concept model; site and key areas are provisional.	Replace with official boundary, survey, ownership, heritage, fire, utilities and access records; recompute same formulas.
Public or de-identified inputs	No personal data, profiling or identity tracking.	Human review, manual fallback, deletion/exit log and appeal route at every node.

Sources, licenses, rights status, permitted/prohibited uses and unresolved boundaries are recorded in sources.json; the embedded Noto Sans SC font is used by this PDF and paired HTML/figure surfaces.

06 | Public communication and verification list

English and Chinese surfaces are substantive counterparts. The visual index, report pages, figures and A0/A3 PDFs are generated from the same evidence version. Text and line-type redundancy, scale/north/path context and explicit PROVISIONAL notices are used; no third-party logos, portraits or photographs are embedded.

Before any implementation	Required evidence
Boundary and geometry	Official boundary/redline, key-area polygons, survey and ownership; recompute all affected metrics.
Regulatory and access	Heritage, fire, utilities, accessibility, road/rail controls and municipal-load records.
Operation and trust	Named operator, authorization, rights ledger, privacy review, takeover drill, appeal owner and exit/archive evidence.
Public release	Human-reviewed bilingual content, readable figures, font embedding, source rights and a dated change note.
