

CELL•JZ | Regional synergy

PROVISIONAL

Five interfaces: capability card → aggregate indicator → human review → small test → exit / hand-off.

Key areas | nodes + landmarks

L1–L3 are independent landmark catalogue entries; P01–P05 are demountable components.

N1 Cell Neighborhood

cell unit · living · research

HUMAN FALLBACK

N2 Smart Weave

public interface · feedback

HUMAN FALLBACK

N3 Growth Courtyard

reversible kit · events

HUMAN FALLBACK

INDEPENDENT AI LANDMARKS

L1 Jingzhang
Time-Weave Gate

public history · park entry

L2 Open-City
Instrument Tower

delayed anonymous indicators

L3 Growth-Component
Archive Walk

origin · repairs · reuse

PUBLIC-SPACE COMPONENT LIBRARY

P01 shade · P02 staffed desk · P03 display · P04 exhibit frame · P05 data label

PROVISIONAL

Land-use structure | 27 features

land_use_feature_count = land_use_zone_count = 27; both mean GeoJSON feature count, not statutory parcel count.

Park green		5 features
Residential		8 features
Business		5 features
Research		4 features
Commercial		3 features
Culture		2 features

27 = 5 + 8 + 5 + 4 + 3 + 2

Recalculate with official GIS using the same formula; concept data only.

PROVISIONAL

Slow mobility + blue-green

Clear route, separate information card and human fallback.

GREEN BELT

L1

PROVISIONAL

ORANGE CARD | STREET RULE

· slow mobility in event periods

· aggregate indicators only

· human guide on failure

· no opening before safety/access review

Metric evidence | traceable and reversible

GeoJSON → metrics.json → bilingual outputs → matrices → self_check; areas and ratios are provisional.

A0

Delivery and operating commitments

Scope	Three scopes: regional coordination, overall design, and key-area design. Site boundary, area, and land use remain provisional until authority and access review.
Core idea	The retained spatial sequence is Cell Neighborhood → Smart Weave Platform → Growth Courtyard: living/research, public interface, and reversible activation.
Evidence	27 land-use features are the single count used across geometry, matrices, HTML, and bilingual graphics. Formal metrics are finite geometry-derived values, not statutory conclusions.
Safeguards	Anonymous/offline testing, human fallback, staffed public desks, stop conditions, access review, and a reversible component kit keep the proposal reviewable and operable.
