

One-belt concept (concept suggestion)

- Coordinated research scope: ~43.6 km2

Five operational mechanisms (concept)

Three formal core metrics (participant provisional model data)

- One-light - Night Lounge (Zhongzhiyuan side): pre-station lighting tiers & night guide hub

- Overall design scope: ~11.4 km2

- Time-based operation permits: time x location x volume x business type

- One-show - Night Stage (AI Origin Community side): time-scheduled soundscape open stage

- site_area_sqm ~ 1,141 ha (low confidence)
- Key detailed-design areas: ~368.4 ha

- Night lighting tiers: gateway - path - node - dark zone

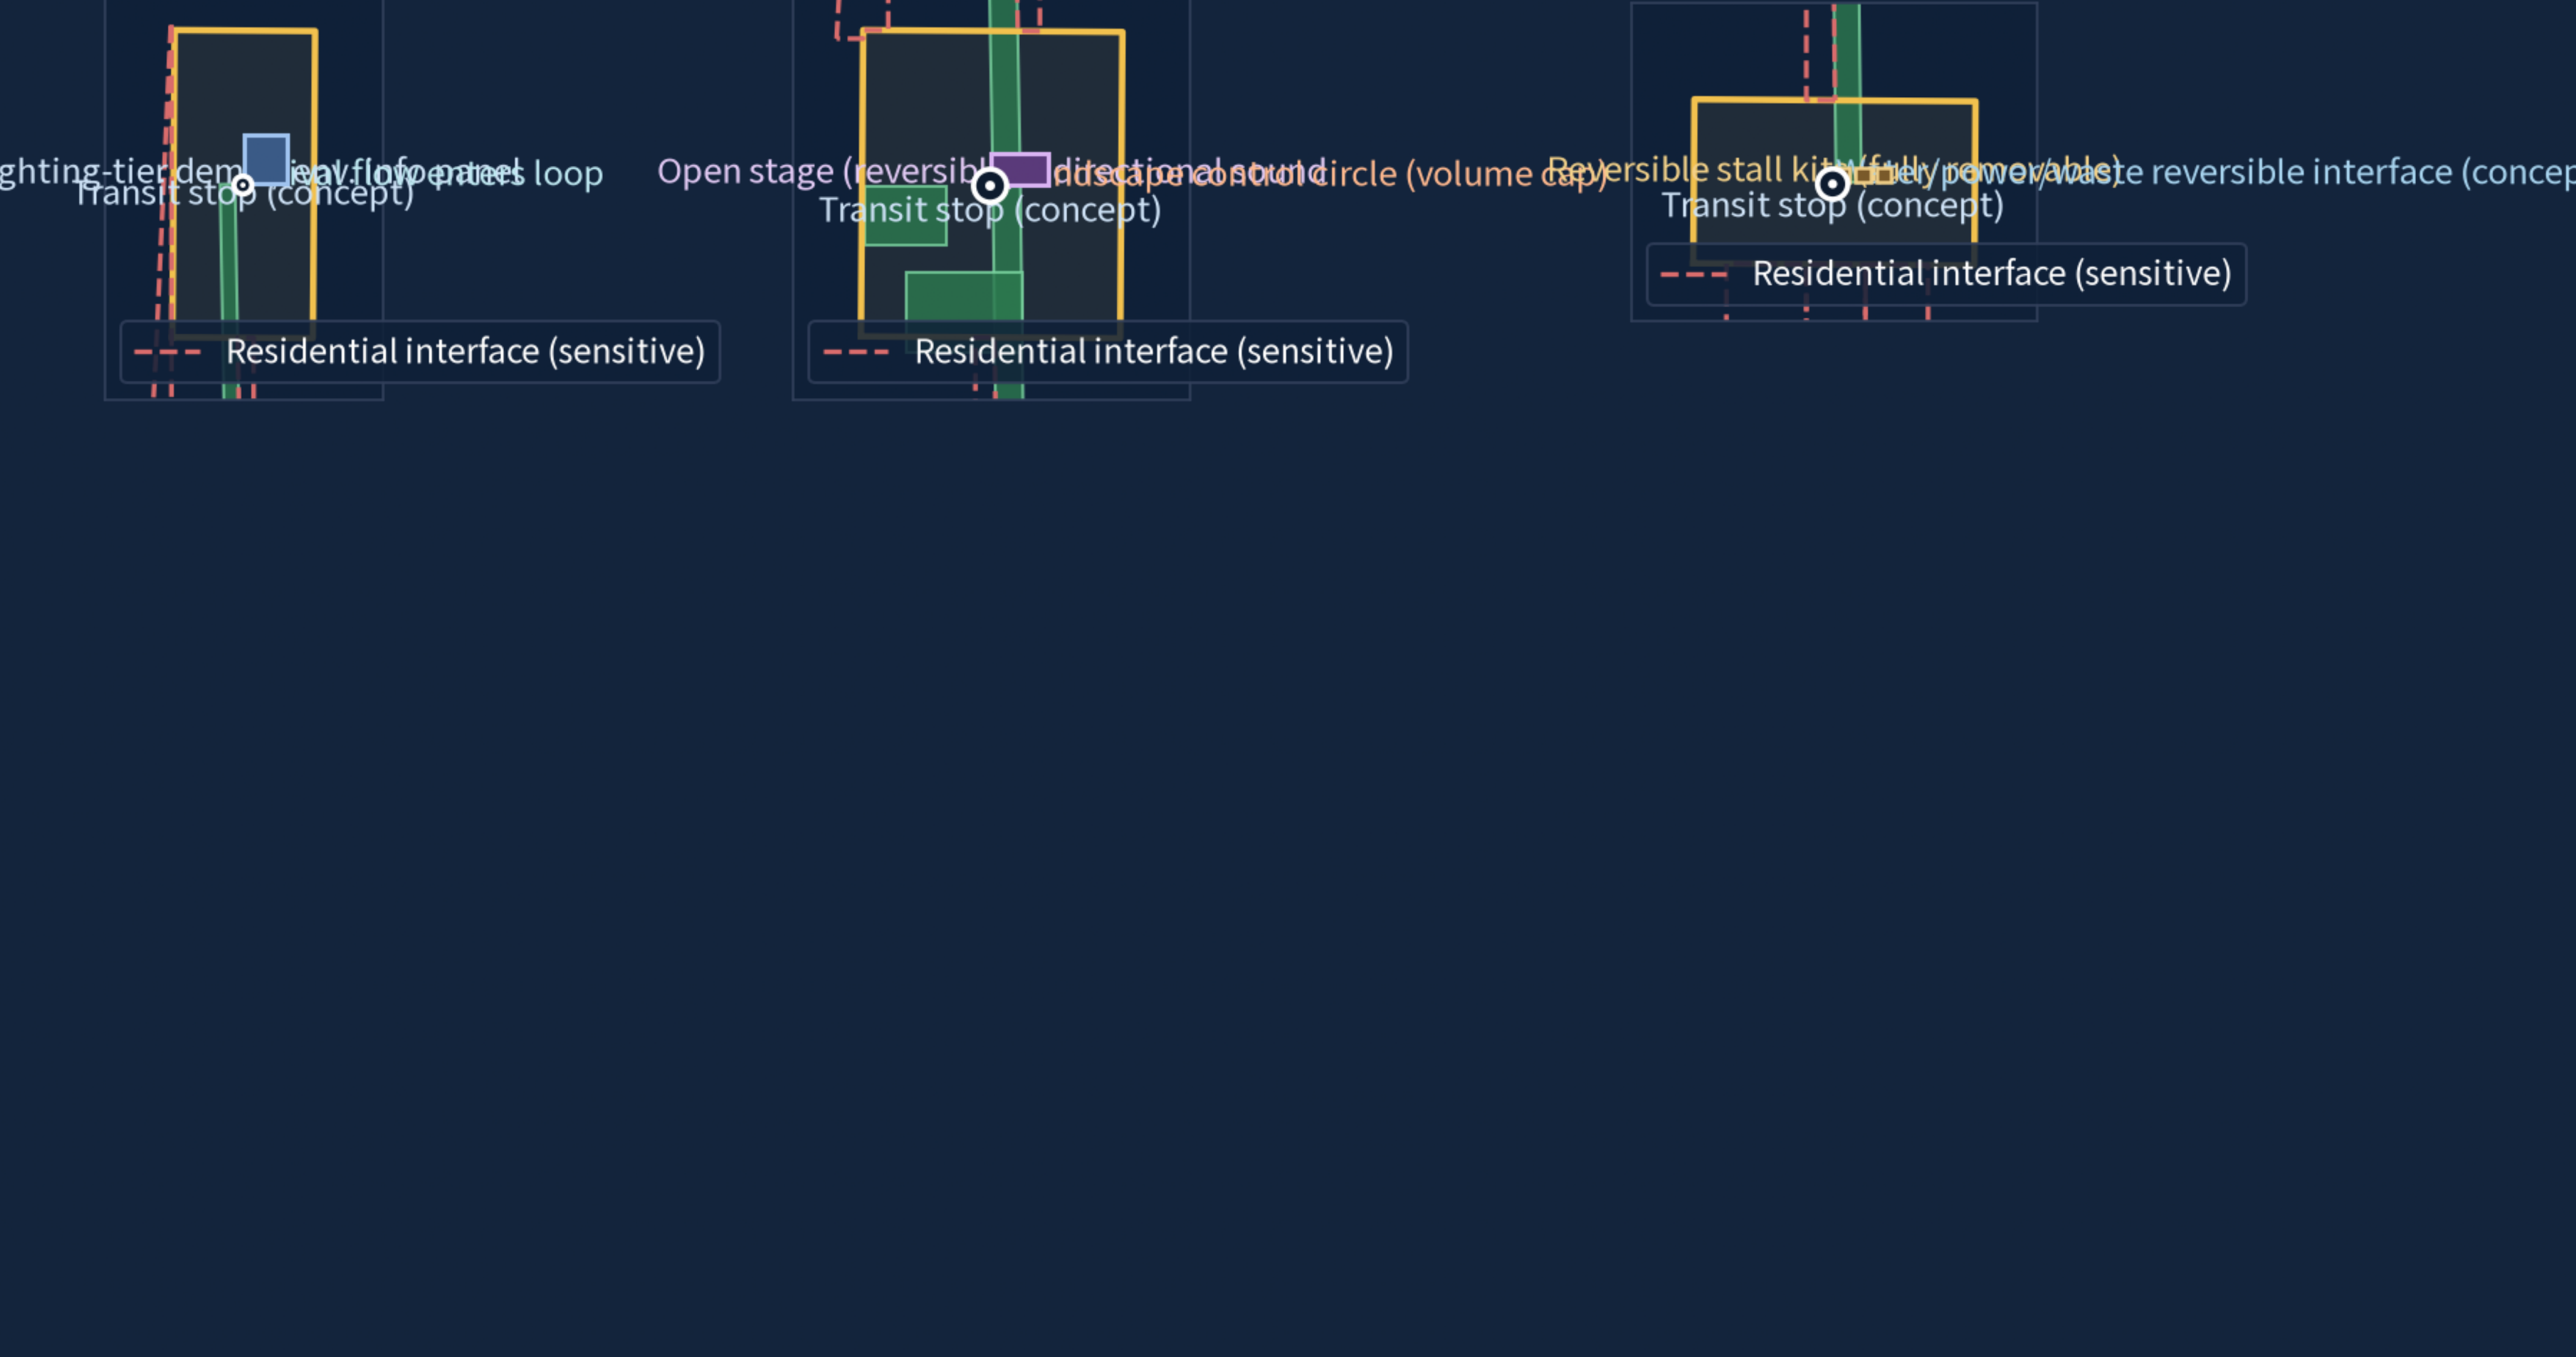

- One-market - Night Market (Dazhongsi side): low-impact reversible stall market

- green_ratio ~ 11.0% (concept greenline caliber)
- This package's footprint: overall design scope (provisional concept geometry, ~1,141 ha; NOT an official redline)
- Night-economy service credits: stallholder trust & event feedback

- One-loop: Night Loop along the Jingzhang heritage park belt and transit stops organising a continuous loop

- Event filing collaboration: inform - inspect - evaluate

- public_space_ratio ~ 0.45% (concept public-space caliber)

Costs & monitoring (qualitative tiers)

- Phasing (concept pace): near-term 1-3y lighting tiers & pop-up validation -> mid-term 3-5y

- Responsibility matrix RACI (concept framework): area operation coordination (lead) / ligh

Aggregation: class area (land_use.geojson) / site area; green_ratio 11.0% is the concept gree

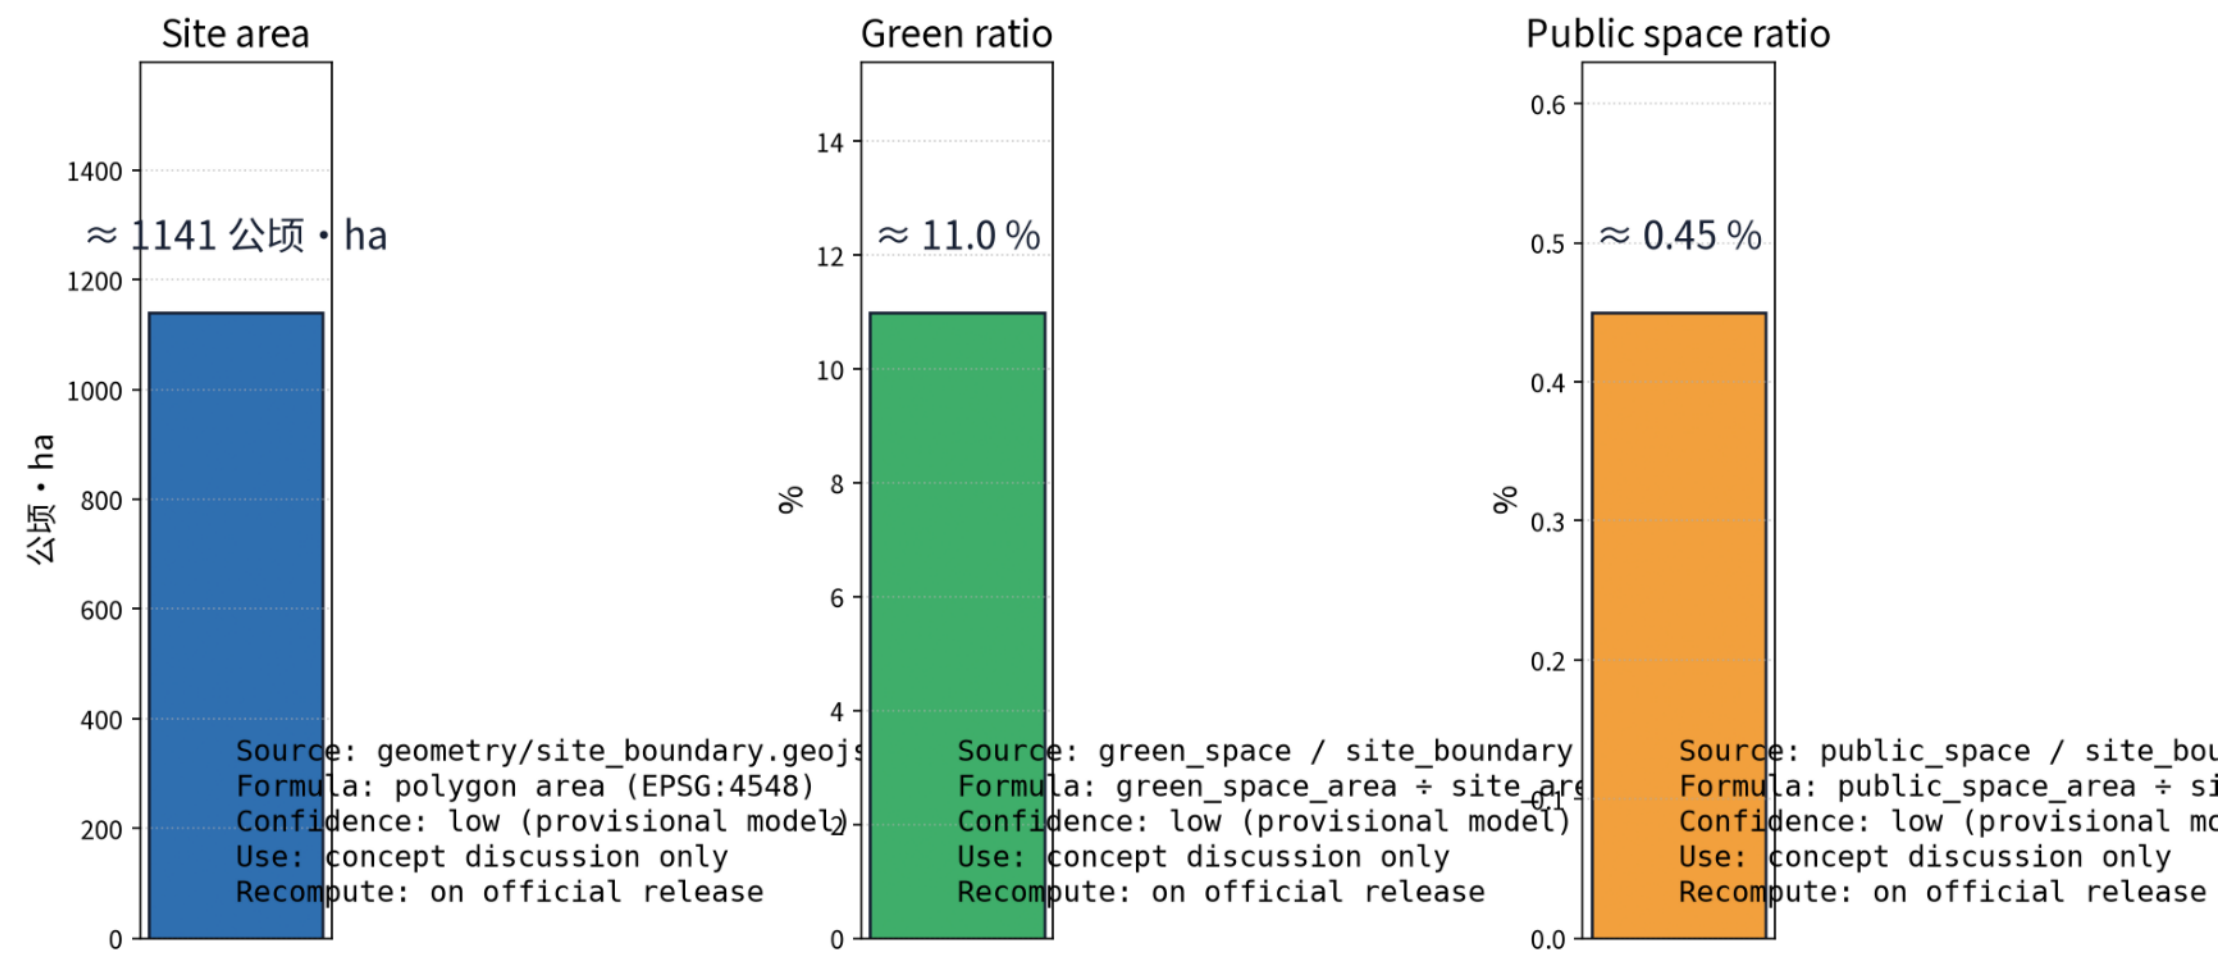

- Cost categories (qualitative tiers only, no unverified amounts): lighting components (low/

- Every phase has evaluation thresholds: unmet targets trigger stop/withdrawal (stop cond

- Pre-admission conditions: site safety verification, baseline night-environment monitoring

- Method: order-of-magnitude from comparable pilot price bands; base period 2026 conce

Three Formal Core Metrics - Evidence Chart | provisional model values (low confidence, rounded display

PROVISIONAL concept boundary - NOT an official redline - recompute after official data release

SIONAL concept boundary - NOT an official redline - recompute after official data release

Note: displayed values are participant provisional model data, rounded for display; many-decimal values are NOT survey-grade or official accuracy.

this board is participant provisional model data; not an official redline, survey accuracy, approval or government conclusion.
