

One-belt concept (concept suggestion)

- Coordinated research scope: ~43.6 km²

Five operational mechanisms (concept)

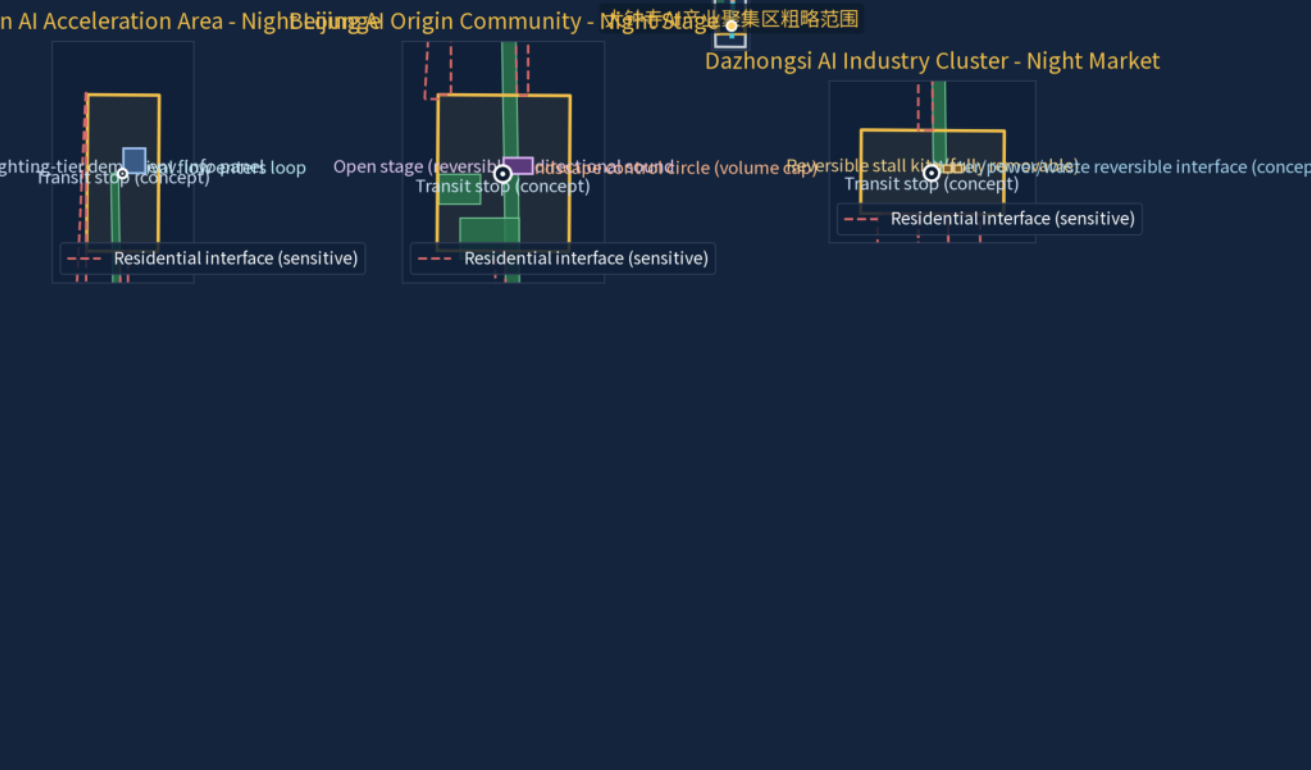

Three formal core metrics (participant provisional model)

- One-light - Night Lounge (Zhongzhiyuan side): pre-station

- Overall design scope: ~11.4 km²

PROVISIONAL concept boundary - NOT an official redline - recompute after official data release

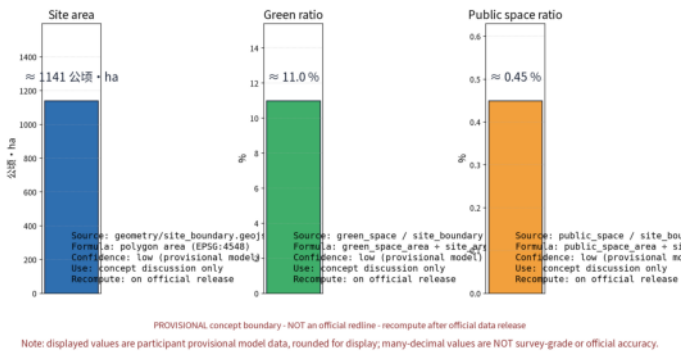

Data on this board is participant provisional model data; not an official redline, survey accuracy, approval or government conclusion.

Costs & monitoring (qualitative tiers)

- Phasing (concept pace): near-term 1-3y lighting tiers &

Three Formal Core Metrics - Evidence Chart | provisional model values (low confidence, rounded display)

- Responsibility matrix RACI (concept framework): area

Aggregation: class area (land_use.geojson) / site area; gr
