

NIGHT·JZ — One Light · One Show · One Market

Night-economy & lightscape operation belt · concept package · three-node north-to-south sequence

Night Loop: Night Lounge → Night Stage → Night Market; AI advises, people decide.

Source: this package geometry/*.geojson (participant provisional model data); area caliber EPSG:4548; displayed values rounded.

Provisional concept boundary; not an official redline; recompute after official data release

NORTH · Night Lounge · One Light

Station-level lighting tiers and human-reviewed night guidance. Zhongzhiyuan side; public fallback remains available.

CENTRE · Night Stage · One Show

Reversible open performance and community stage. Time-based permits, soundscape control and resident notice.

SOUTH · Night Market · One Market

Low-impact reversible stalls and light food. Matching is advisory; permits, safety and sanitation stay human-led.

Five mechanisms + AI governance

Permits · lighting tiers · service credits · event filing · annual disclosure. Anonymous aggregates only; key decisions human-reviewed and stoppable.

Nodes · Metric Evidence · Land-Use Caliber

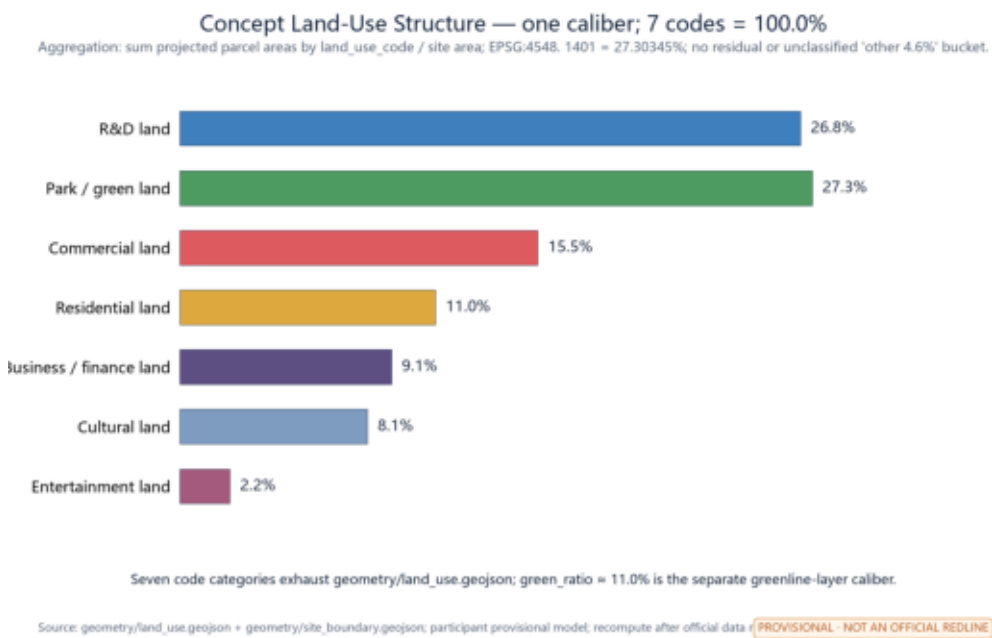

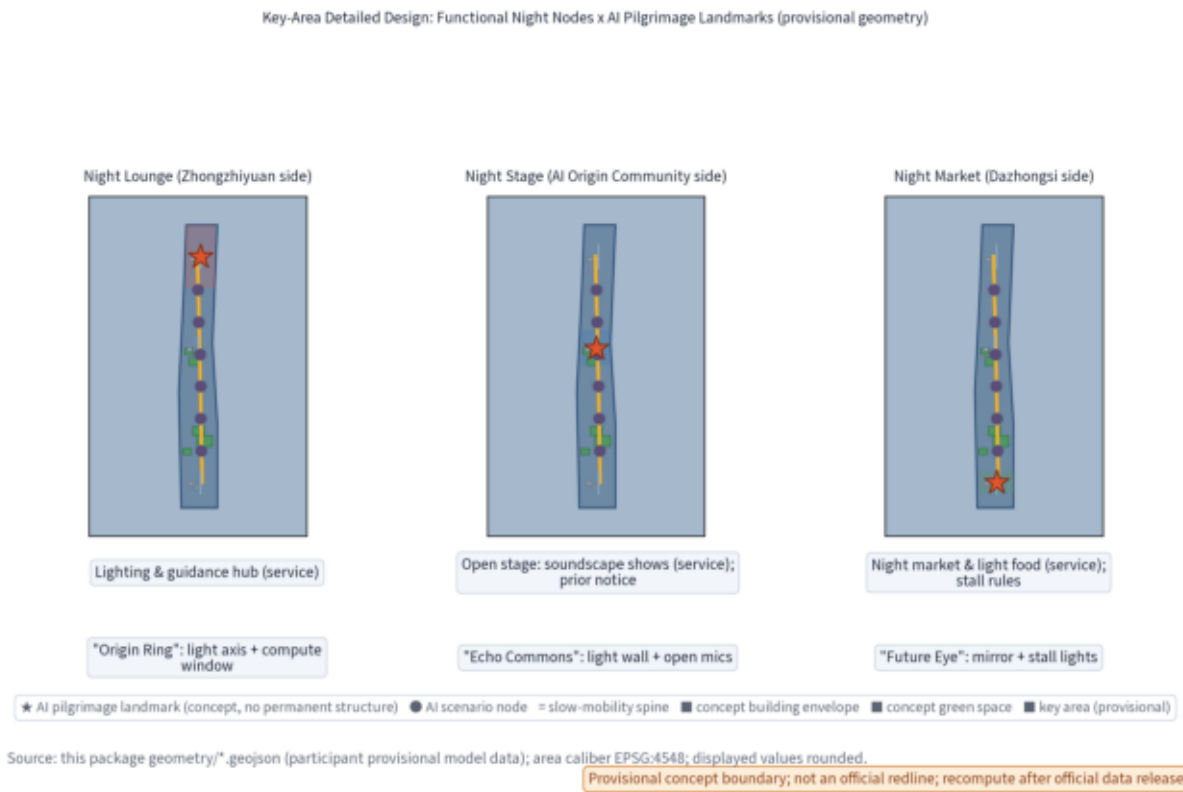

A3-02 · functional nodes remain distinct from pilgrimage landmarks; seven land-use codes exhaust the geometry

North → centre → south sequence

Night Lounge / Zhongzhiyuan → Night Stage / AI Origin Community → Night Market / Dazhongsi

Core formal indicators

site area $\approx$ 1,141 ha | greenline ratio $\approx$ 11.0% |
public-space ratio $\approx$ 0.45%. All values are provisional
model data; full values and formulas live in
metrics.json.

Land-use evidence — one reproducible caliber

1401 Park / green land = 3,116,095.041 sqm / 11,412,825.386 sqm = 27.30345% (display $\approx$ 27.3%). The 27 features fall into seven codes totaling 100.0%; no residual "other 4.6%" class. green_ratio $\approx$ 11.0% is a separate greenline-layer metric.

Public-interest / governance guardrails

Night access remains human-facing; anonymous aggregation only; every AI output is reviewed and stoppable. Failure, safety, privacy or escalated resident complaints suspend permits, withdraw reversible components, downgrade lighting within 48 hours, and publish an incident statement within 7 days.
